PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate aiming to grow into an engineer who can turn an unclear brief into something people actually rely on — comfortable moving between the research/model side of a problem and the systems that deliver it, especially where software must hold up under real constraints such as limited connectivity or safety-critical monitoring.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (4th Year)	Amity University, Noida	8.98 (till 6th semester)	2023-2027
Intermediate (Class XII)	CBSE Board	93.60%	2023
Matriculate (Class X)	CBSE Board	93.40%	2021

Relevant Coursework: Data Structures and Algorithms • Operating Systems • Database Management Systems

TECHNICAL SKILLS

Languages	Python, JavaScript, C++, SQL
Frontend	React.js, Next.js, Tailwind CSS, HTML5, CSS3
AI/ML	Scikit-learn, TensorFlow, PyTorch, Matplotlib, LangGraph
Databases	Firebase, Supabase
Tools	Git, GitHub, VS Code, Blender

INTERNSHIPS

- **AI/ML & Backend Engineering Intern | Hitesh Enviro Engineers Pvt. Ltd.**
HEEPL Industrial AI Platform 04 May 2026 – 05 July 2026
 - Designed a four-agent Flask REST API platform (**DataAgent, AnalysisAgent, LLMAgent, PreventiveAgent**) for industrial wastewater anomaly detection.
 - Built **LLM-based chemical treatment prescription** and ISO 10816-based equipment health monitoring across 17 industry sectors.
- **Team Lead & Intern | IIT Ropar**
Vicharanashala 15 May 2026 – 15 July 2026
 - Led a **10-member team** building **PrashnāSārathi**, a community Q&A/FAQ platform built with Next.js, Node.js/Express, MongoDB, and Redis. (GitHub)
 - Designed the **MongoDB schema** for FAQ storage, structured from FAQs extracted and collected from the target site.
 - Added an AI-generated-answer layer on top of the community question–response flow.

PROJECTS

- **AI-Driven Water Resilience Platform (DropConnect)**
Track Winner (University category) — Xylem Global Student Innovation Challenge 2025, among 4,000+ teams worldwide
 - One of a 5-person team; owned the **frontend and database schema** for a platform matching student/NGO volunteers to water-resilience events. Built with React.js, Tailwind CSS, and Supabase (Prisma ORM + PostgreSQL); used **XGBoost** for disaster-zone classification. (GitHub)
- **AI Platform for Exoplanet Discovery (Exoplanetarium)**
2nd Runner-Up — NASA Space Apps Challenge, Noida 2025
 - Designed a complete full-stack application with a **React/Three.js** frontend and a Python backend, handling database design, API integration, and infrastructure deployment. (GitHub)
- **AI-Powered Rural Telehealth Platform (MediConnect)**
Top 50 — IIIT Delhi Hack4Health Hackathon by Horiba
 - Built an **AI triage system** that classifies cough recordings and tongue/wound images to flag likely TB and skin conditions for early referral, alongside a multilingual health guide and offline-first digital health records for low-connectivity clinics. (GitHub)
- **Real-Time Voice AI for Emotional Awareness (EchoWithin)**
 - Built a full-stack voice application with Next.js, Supabase/Prisma, and a Flask API, using Vapi AI for real-time voice interaction; implemented an **emotion-analysis engine** with interactive dashboards and user-specific conversation logging. (GitHub)
- **Adversarial Robustness Testing Lab (AdversaNet)**
 - Built a full-stack application using Next.js and Python for adversarial ML experimentation, implementing **FGSM/PGD attack algorithms** on TensorFlow/PyTorch models with a database schema for model-testing results. (GitHub)

HACKATHON ACHIEVEMENTS

- **Xylem Global Student Innovation Challenge 2025, Track Winner (University category)** — AI-Driven Water Resilience Platform (DropConnect), among 4,000+ teams worldwide.
- **NASA Space Apps Challenge, Noida 2025, 2nd Runner-Up** — AI Platform for Exoplanet Discovery (Exoplanetarium).

CERTIFICATIONS

- **Python for Data Science** — NPTEL, IIT Madras (*Silver*)
- **Python for Data Science, AI & Development** — IBM (Coursera)
- **Developing AI Applications with Python and Flask** — IBM (Coursera)
